

Rotate Elements

There are two ways to rotate an element: The **Rotate Handle** or the **Transform Toolbox**.

Rotate Handle

The **Rotate Handle** is the blue dot above an element.

1. Click on the element
2. Click on the blue dot

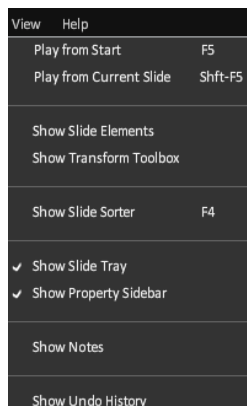

3. Holding down the button on the mouse down, drag the mouse to rotate the element

4. Release the mouse to set the location

Transform Toolbox

1. Go to **View**
2. Click **Show Transform Toolbox**

3. **Rotation:** Set the rotation of the element in degrees either by dragging within the circle or by entering a number in the box. Hold the Shift key down to limit rotation to 45-degree increments
